By the amendments herein, the four independent claims are being amended to further clarify the claimed invention, and to expedite prosecution, although without acquiescence in the grounds of the rejection, or prejudice to pursue at a later time. It is believed that the invention as presently claimed is novel and distinct from the cited patents, for reasons explained in the Remarks below.

Accordingly, please amend this application as shown herein. In view of the amendments and accompanying remarks, reconsideration of the present rejection is respectfully requested.
